

HIGH-OUTPUT INDOOR,

GREAT SOUND FOR LARGE VENUES

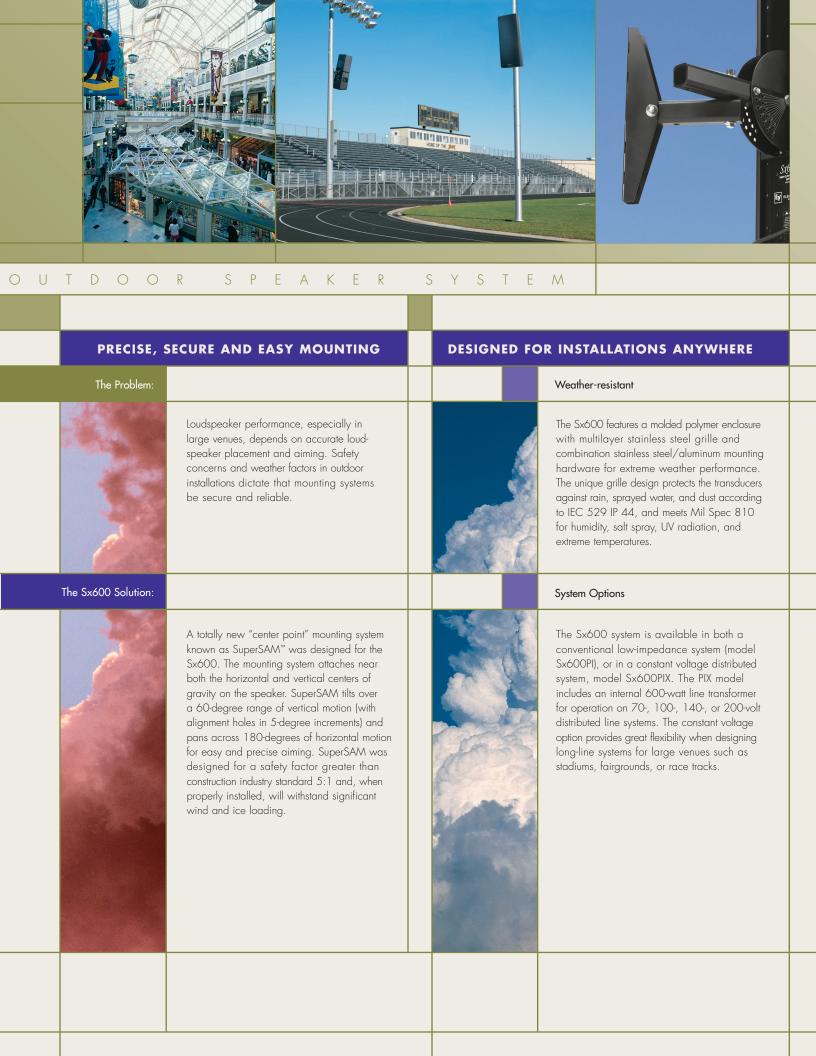

The Problem:

Historically, large venues such as indoor arenas and outdoor stadiums operating under limited budgets challenge sound system designers with serious tradeoffs. Anything approaching "good sound" or higher fidelity is usually out of the question. Typical systems are either loud but lacking vocal intelligibility, or intelligible but of very limited bandwidth and, of course, neither loud nor intelligible. Simple voice reproduction is often overly resonant, difficult to understand, and unable to achieve the necessary sound pressure level.

The Sx600 Solution:

The Electro-Voice® Sx600 loudspeaker delivers exactly what large venues need: substantially improved fidelity, especially in the vocal range, at high SPLs. To achieve this, Electro-Voice engineers created a dual element, critically spaced, low frequency line array to produce the SPL levels of a horn-loaded low/mid section. Then, they added the clear vocal reproduction of a critically dampened direct radiator system.

The Sx600 loudspeaker employs several performance-proven EV® innovations, such as a neodymium-based mid-driver from EV X-Array™ concert systems, and an EV DL-Series woofer that augments response below 300 Hz, improving directivity. On the high-frequency end, an Electro-Voice DH2T compression driver, coupled to our unique Varipath™ constant directivity HF horn, produces both long throw and wide front-to-back audience coverage. And our Ring Mode Decoupling® (RMD®) technology is used throughout the Sx600 to ensure level-independent tonal response and a high level of intelligibility.

Sx600 Technical Specifications

Frequency Range

	(-10 dB): 80 Hz-19 kHz	
Max. Calculated SPL:	133 dB continuous	139 dB peak
Horizontal Coverage:	65° nominal	

(-3 dB): 100 Hz-18 kHz

65° nominal Vertical Coverage: LF Power Handling: 600 watts continuous 2400 watts peak

HF Power Handling: 60 watts continuous 240 watts peak Sensitivity (SPL 1 W/1 m): 105 dB

1.8 kHz Crossover Frequency: LF/MB Overlap: 200-600 Hz

Recommended Filtering: 90 Hz high pass filter, @ Q=1.6

Recommended Amplifier: EV CPS Series

Connectors: SJOW cable with gland nut

70 V: 75, 150, 300, 600 W "X" Version Wattage Taps:

100 V: 150, 300, 600 W 140 V: 300, 600 W 200 V: 600 W

SuperSAM™ Mounting: 60° vertical (5° increments)

180° horizontal

Can be bolted or strapped

Enclosure Material: High-density polymer

Powder-coated stainless steel Grille:

Weather Resistance: IFC 529 IP 44

Mil Spec 810 humidity, salt spray, temp, UV

Dimensions ($H \times W \times D$): 45.8" x 16.9" x 12.3" (1163 mm x 429 mm x 312 mm)

Net Weight (with bracket): Sx600PI: 80.0 lbs (36.3 kg) Sx600PIX: 98.0 lbs (44.5 kg)

Shipping Weight: Sx600PI: 92.0 lbs (41.8 kg) Sx600PIX: 110.0 lbs (50.0 kg)
