

Functional safety

From the safety switch to the safe controller

Smart solutions for functional safety

The Internet of Things is extending into the processing industry. Networking all units in a digital factory requires a holistic approach to processes and this also includes functional safety.

We work continuously to ensure that our safety solutions always provide the ideal protection for people and systems as we move into the digital age. And you can further increase system availability by integrating safety into your modular automation systems. Read more about this on the following pages.

Progress through innovative technologies

Those who want to play a leading role in technology must make a decisive contribution to current trends and developments.

For Phoenix Contact, innovations are a pioneering bridge to the future. Take a look at the technologies we offer in functional safety and the advantages they provide.

Relay Technology

Designed by Phoenix Contact

Relay technology – developed to change

Phoenix Contact has developed a force-guided elementary relay that delivers full performance with an overall width of just 6 mm. The miniaturization of mechatronic functions enables modular safety concepts, such as those required for Industry 4.0.

With a switching capacity of 6 A, the relay offers maximum availability with the redundant diagnostic contact and enabled us to develop the PSRmini safety relay in a 6 mm housing.

SafetyBridge Technology – safety without a safety controller

What is SafetyBridge Technology?

SafetyBridge Technology enables you to realize distributed safety solutions. No safety controller whatsoever is required and it does not depend on the network used. The technology is integrated into the Inline and Axioline I/O systems and is compatible with all bus couplers of these systems. The safe I/Os are installed with the standard I/Os distributed within the equipment.

The system consists of safe input modules, safe output modules, and one logic module. The logic module acquires and outputs safe signals. It generates and monitors the safety-related SafetyBridge transmission protocol and processes the

logical links of the configured safety logic. The logic module therefore assumes the task of a safety controller.

You create the SafetyBridge safety logic easily by drag and drop with our SAFECONF configuration software. The intuitive operation allows you to configure your safety logic in accordance with the standards, without any need for programming knowledge.

Easy configuration using SAFECONF

SAFECONF
Configuration Software

SafetyBridge Technology ¹

Designed by Phoenix Contact

Transmitting safe data via wireless systems

SafetyBridge Technology makes it possible for you to transmit all safety-relevant data signals wirelessly. You can choose between the two wireless technologies Bluetooth and WLAN. This lets you replace cable and slip ring transmission systems

with wireless paths without altering the safety characteristics of the safety application.

The combination of safety and wireless has many advantages. This solution can be easily integrated into existing automation

networks and helps save on the costs of a distributed or mobile machine structure. Furthermore, safety signals can be transmitted reliably over large distances.

IO-Link Safety: The new standard

With IO-Link Safety, you can benefit from all the familiar advantages of IO-Link. Now that IO-Link technology has been extended to include safety, you can connect safety technology and automation via a universal interface. This enables you to introduce new, manufacturer-independent machine and system concepts with safety-related sensors and actuators.

 Web code: #3256

Your advantages

- ✓ Increase productivity through detailed condition data
- ✓ Simplify installation, maintenance, and replacement processes with implemented standards
- ✓ Increase data availability and accuracy through simple A/D conversion
- ✓ Fast configuration and troubleshooting with remote diagnostics

Safe communication from start to finish

End-to-end safety from the sensor to the controller

The IO-Link Safety technology enables consistent communication from the control level right through to the connection of safe sensors and actuators. The safety-related system expansion is based on the use of IO-Link Safety masters and IO-Link Safety devices. You can now benefit from all the valued IO-Link advantages, such as the network independence of sensors and actuators, standardized connection technology, the use of an IODD for parameterization, or the simple replacement of devices.

IO-Link Safety master

The IO-Link Safety master is intended as an interface between safe/non-safe IO-Link sensors and actuators and safe PROFINET control systems. A total of eight safe IO-Link Safety ports are available for integrating IO-Link and IO-Link Safety devices (4 x Class B ports and 4 x Class A ports). The series connection is made via the power supply with standardized, L-coded M12 connection technology.

Main features

- PROFINET/PROFIsafe communication
- Easy integration with multifunctional ports
- Connection of actuators of up to 4 A
- IO-Link specification V1.1.3
- Connection with M12 connectors with push-pull fast connection or screw connection
- 2 Ethernet ports (with integrated switch)
- IP65/IP67/IP69K degree of protection

IO-Link Safety device

The IO-Link Safety I/O box enables the integration of safe sensors and actuators into IO-Link Safety systems. There are eight safe digital inputs and four safe digital outputs available for this purpose. They allow easy connection of sensors and actuators in the field and provide access to extended diagnostic data.

Main features

- 1 IO-Link port Class A
- 8 safe digital inputs
- 4 safe digital outputs
- M12 connectors (A-coded)
- Enables IO-Link Safety communication

Successful in application

Our safety products prove themselves daily in a wide variety of areas. With 100 years of experience in machine building and automation, we are working on tomorrow's intelligent production today.

Furthermore, with our extensive application expertise, we provide you with a broad portfolio for applications in the automotive industry and the process industry.

Your advantages

- ✓ Many years of experience, innovative solutions, and the latest technologies
- ✓ Member of all key standardization committees
- ✓ Comprehensive knowledge of legal safety
- ✓ Numerous TÜV-certified employees worldwide
- ✓ Active participation in steering committees and research projects

Safety technology for your needs

At home in machine building

Phoenix Contact has close ties with the machine building industry. Because we have our own machine building facilities in house, we completely understand your daily challenges.

We provide:

- A broad portfolio of safety technology, approved globally in accordance with EN ISO 13849-1 and EN IEC 62061
- A high level of sensor compatibility and easy installation for the fast and economical realization of your safety concepts

Experience in the automotive industry

As a long-term partner of the automotive industry, Phoenix Contact provides fully developed automation solutions for robust, open, and consistent automation solutions.

We provide:

- A broad portfolio of safety technology, approved globally in accordance with EN ISO 13849-1 and EN IEC 62061
- Comprehensive diagnostic options
- Reliable automation for high-end applications
- No imperfections on the end product, with the use of PWIS-free components

Partner for the process industry

With pioneering solutions in connection and automation technology, Phoenix Contact is your key partner for ensuring exceptionally high availability in the process industry.

We provide:

- ATEX-certified, robust safety technology
- XC product versions for use under extreme conditions
- Safe components for use in furnaces (in accordance with IEC 61508/61511 and EN 50156) and in the shipping industry (DNV)

Product portfolio

We make functional safety easy. From non-contact safety switches through to complex controllers, all safety products from Phoenix Contact are SIL-certified. You can install and configure the modules easily.

Benefit from the comprehensive service offered by our certified safety experts. With our extensive range of services, we can help you meet all requirements regarding the safety of machinery.

 Web code: #0299

Safety switches

Use our non-contact safety switches for intelligent safety door and position monitoring.

➤ More information starting on page 12

Emergency stop switches

With our TÜV-certified emergency stop switches, you can immediately put your machine or system in a safe state if there is an emergency.

➤ More information starting on page 14

Safety relay modules

If your application demands just a small number of safety functions, there is a large selection of safety relays, safe signal conditioners, and safe motor starters at your disposal.

➤ More information starting on page 16

Configurable safety systems

The PSRmodular configurable safety system is a flexible safety solution for monitoring your machine or system.

➤ More information starting on page 26

Safe I/Os

Integrate functional safety into your existing network, whether in the control cabinet or in the field. With SafetyBridge Technology, the safety function is processed directly in the I/O modules.

➤ More information starting on page 28

Safe control technology

With our safe high-performance controllers, you can integrate reliable functional safety into PROFI-safe networks for applications with special demands on safety and availability.

➤ More information starting on page 30

Safe power supplies

Our high-performance QUINT POWER power supplies ensure the maximum availability of your system and satisfy all of the functional safety requirements.

➤ More information starting on page 32

Non-contact safety switches

The compact PSRswitch is an electronic, coded safety switch for flexible safety door and position monitoring. With the integrated RFID technology and intelligence, it offers maximum protection against manipulation and the highest level of safety in accordance with EN ISO 13849 and EN ISO 14119. You receive a cost-effective complete solution with compatible evaluation units and sensor/actuator cabling.

 **Web code:** #1940

Your advantages

- ✓ Compact design for flexible mounting on doors and hatches
- ✓ Safe series connection of up to 30 safety switches in a two-channel design
- ✓ M12 for easy installation and maintenance
- ✓ Three types of RFID coding for maximum manipulation protection
- ✓ Restart function locally on the switch saves wiring effort

Intelligent safety switch system with IO-Link

PSRswitch
RFID coded, non-contact safety switch

SAC cabling
Easy installation with M12 male connectors and SAC cables

IO-Link
PSRmini
Highly compact safety relay with IO-Link interface

Integrated diagnostic channel

Our safety switch system comprises the PSRmini evaluation unit and the PSRswitch safety switches. The safe series connection is in a two-channel design. Parallel to this, status information for the individual switches is transmitted to the PSR-MC42 PSRmini safety relay via the integrated diagnostic channel. Regardless of the safety concept, the non-safety-relevant diagnostic data of the PSRswitch is transmitted to the controller via the intelligent diagnostics channel and an IO-Link gateway. The data can be evaluated centrally there.

Smart sensor

The sensor has the properties of a safety relay. LEDs constantly display the current state of the sensor.

Series connection up to PL e

Up to 30 safety switches can be connected in series safely with PL e in accordance with EN ISO 13849.

Safe individual wiring

You can wire the safety switches individually. PSRmodular and safe I/Os are also suitable evaluation units.

Magnetic safety switches

Our magnetic safety switches reliably monitor movable guards up to PL e in accordance with EN 13849. The safe and contact-free state recognition is based on the proven magnetic switching principle. Our safety switches are available in three different designs to suit your application.

 **Web code:** #1940

Your advantages

- ✓ Proven magnetic switching principle for reliable condition monitoring
- ✓ Simple diagnostics with LED display directly on the sensor
- ✓ Various designs for flexible mounting on doors, hoods, and covers

Safe acquisition of the condition of movable guards

PSRswitch
Magnetic safety switch

SAC cabling
Easy installation with M8 male connectors and SAC cables

PSRuni
Multifunctional safety relay

Overview of designs

Unit consisting of sensor and actuator

Flexible orientation
Elongated holes simplify installation

Space-saving integration
Integration in bore holes or holders, e.g., pneumatic cylinders

Flexible installation
Small design for confined spaces

LED indicator
Simple diagnostics with LED display directly on the sensor

Connection versions
Sensors available with pigtail cable or M8 connection

Increased switching interval
Safe, non-contact monitoring enables wear-free sensor technology

Emergency stop switches

With our TÜV-certified emergency stop switches, you can immediately put your machine or system in a safe state if there is an emergency. Our control devices with emergency stop function or emergency switching off function are suitable for applications in accordance with EN ISO 13850 and EN 60204-1.

Choose our ready-to-use solutions for your standard application. Create the ideal emergency stop solution to satisfy your requirements.

 Web code: #2859

Your advantages

- ✓ Increased occupational safety with illuminated active or inactive status indicator
- ✓ Rapid on-site diagnostics with color-coded switching position indicator
- ✓ Protection against installation errors with the self-monitoring emergency stop contact module

Emergency stop switches for every application

Ready-to-use solutions for your standard application

Set up your emergency stop unit quickly and easily by using our preassembled switches.

Our portfolios enable quick and easy mounting, whatever the demand: Install the solution directly in the field, in the operator panel, or in the machine control cabinet. As an option, our emergency stop buttons are available with 5-position M12 connection and installation via plug-and-play.

Modular system for customer-specific applications

Our modular emergency stop control devices provide cost-efficient safety solutions tailored to your requirements.

Combine actuators, module holders, and contact modules to meet your needs. Upon request, integrate additional functions such as illuminated anti-lock collars, for a particularly high level of safety.

Increased occupational safety

Illuminated emergency stop switches identify active machine parts in accordance with EN ISO 13850 and provide additional safety.

Rapid on-site diagnostics

All emergency stop control devices are equipped with a colored switching position indicator for time-saving on-site diagnostics.

Protection against installation errors

Self-monitoring emergency stop contact modules automatically switch your machine to a safe state in the event of errors or damage.

Safety relays

With the PSRmini and PSRclassic safety relays from Phoenix Contact, you can implement all safety functions for applications where the motto is one function, one device. The safety relays are compatible with many signal generators such as emergency stop devices, safety door switches, and light grids. The modules are available in various sizes, with multiple connection technologies and a wide range input.

 Web code: #1944

Relay Technology

Designed by Phoenix Contact

Your advantages

- ✓ Space savings of up to 70% with the compact design
- ✓ Relay technology developed in-house features proven safety with force-guided relay contacts
- ✓ High level of scalability, starting at just one enable contact
- ✓ Compatibility with many safety signal generators

Safety relays for machine building

Highly compact PSRmini safety relays

PSRmini safety relays are the narrowest on the market. With overall widths of just 6 mm and 12 mm, we provide proven safety with our in-house developed relay technology featuring force-guided contacts.

The innovative DIP switch concept enables you to make selected settings directly on the module. In addition, the needs-based structure starting from an enabling path ensures increased flexibility in your application – without performance restrictions.

Main features

- Overall width 6 mm and 12 mm
- Proven safety with force-guided relay contacts
- TÜV certified
- Approvals for all global markets
- PL e in accordance with ISO 13849 and SIL 3 in accordance with EN IEC 62061
- High level of scalability, starting at just one enabling path

PSRclassic conventional safety relays

The PSRclassic safety relays have a long proven track record. With the 2-channel wiring and force-guided contacts, you can reliably switch functions such as two-hand control devices or light grids. Screw or spring connection technology and status LEDs ensure fast wiring of contacts and easy diagnostics.

With our modular safety relays, you can create your safety system easily and flexibly in accordance with the modular principle.

Main features

- Overall width from 17.5 mm
- Large selection of versions
- Proven safety with force-guided relay contacts
- TÜV certified
- Approvals for all global markets
- PL e in accordance with ISO 13849 and SIL 3 in accordance with EN IEC 62061
- Modular components can be extended to up to 42 contacts

PSRuni multifunctional safety relays

With the PSRuni multifunctional safety relay, up to two safety functions can be monitored with just one device. Covering all common safety requirements, such as emergency stops and light grids, PSRuni is a space-saving and flexible safety solution. With easy configuration directly on the device or as an option via software access, commissioning and adapting the device to your requirements is quick and easy.

Main features

- Overall width of 22.5 mm
- Monitoring of two independent circuits
- Various configuration options
- TÜV certified
- Approvals for all global markets
- PL e in accordance with ISO 13849 and SIL 3 in accordance with EN IEC 62061
- Push-in connection technology

Safe coupling relays

The safe coupling relays with force-guided contacts are SIL-certified and are used for electrical isolation and power amplification. Choose between PSRclassic, the market-standard version, and the highly compact PSRmini coupling relays. The latter, with overall widths of 6 and 12 mm, are the narrowest coupling relays on the market. Both product families include coupling relays for emergency shutdown and fire and gas applications that are compatible with various safety systems.

 Web code: #1945

Relay Technology 
Designed by Phoenix Contact

Your advantages

- ✓ Space savings of up to 70% with the compact design
- ✓ Relay technology developed in-house features proven safety with force-guided relay contacts
- ✓ High level of scalability, starting at just one enable contact
- ✓ Innovative diagnostics technologies minimize the time needed for the normatively-specified proof test

Safe coupling relays for the process industry

PSRmini highly compact safe coupling relays

With the relay technology developed in-house, PSRmini are the world's narrowest coupling relays for safe startup and shutdown.

The force-guided contacts enable quick and easy diagnostics. With visual LED diagnostics, SIL 3-qualified inspection is possible directly at the module. Furthermore, active error feedback to the controller ensures short downtimes during planned maintenance phases.

Main features

- Overall width 6 mm and 12 mm
- Safe diagnostics and easy proof test in accordance with IEC 61508
- Proven safety with force-guided relay contacts
- TÜV certified
- Approvals for all global markets
- SIL 3 in accordance with IEC 61508 / IEC 61511 / EN 50156

PSRclassic conventional safe coupling relays

In the PSRclassic series, you will find conventional coupling relays with force-guided contacts for safe shut down.

The conventional coupling relays are characterized by a wide range of features and versions. They are compatible with the common safe systems.

With a housing width starting from 17.5 mm, they correspond with the market-standard housing dimensions.

Main features

- Overall width from 17.5 mm
- Proven safety with force-guided relay contacts
- Safe diagnostics and easy proof test in accordance with IEC 61508
- Approvals for all global markets
- SIL 3 in accordance with IEC 61508 / IEC 61511 / EN 50156

Force-guided coupling relays

The coupling relays with force-guided contacts from Phoenix Contact are basic devices for single-channel control. The coupling relays can be used for electrical isolation, power amplification, and increasing the number of contacts.

The PSR-PLC21 is a safe coupling relay for power adaptation and electrical isolation in high- and low-demand applications. With the PLC21, circuits can be interrupted safely. The safety function is designed in accordance with EN 60204-1 stop category 0.

Main features

- Overall width of 14 mm
- Proven safety with force-guided relay contacts
- Safe coupling relay in accordance with stop category 0
- High- and low-demand applications
- Fuse protection up to SIL 3 in low-demand applications

Over-speed and zero-speed safety relays

Excessive speeds pose a danger to people and machinery. The compact PSRmotion over-speed and zero-speed safety relays shut down rotating machine parts safely if there is an emergency. Our sensor-free over-speed safety relay reliably monitors speeds. Connected to a safety door device, the sensor-free zero-speed safety relay ensures locking until the dangerous motion comes to a standstill. The combined over-speed and zero-speed safety relays combine all functions for safe motion monitoring in one device.

 Web code: #1546

Relay Technology 
Designed by Phoenix Contact

Your advantages

- ✓ Space savings of up to 75% with the compact design
- ✓ Relay technology developed in-house features proven safety with force-guided relay contacts
- ✓ Easy configuration via button on the device
- ✓ Fast configuration and live monitoring with the PSRmotion software
- ✓ Efficient motion monitoring in combination with additional sensor technology or sensor-free technology

Over-speed and zero-speed safety relays for motion monitoring

PSRmotion over-speed and zero-speed safety relays

Our combined PSR-MM20 over-speed and zero-speed safety relay detects overspeeds and zero speeds of rotating parts in conjunction with PNP proximity switches. The configuration is carried out directly on the device without software.

The PSR-MM30 also monitors up to three operating modes and also supports encoders. The free PSRmotion software is available for commissioning and configuration.

Main features

- Overall width from 17.5 mm
- Motion detection via encoder or proximity switch
- Safe motion monitoring up to SIL 3/PL e
- Force-guided relay outputs

PSRmotion
Configuration Software

Sensor-free PSRmotion over-speed safety relay

The safe PSR-MM35 over-speed safety relay monitors speeds without additional sensor technology. Based on the rotary field measurement of the drive, the integrated safety functions STO (Safe Torque Off), SLS (Safely Limited Speed), SSM (Safe Speed Monitor), and SSR (Safe Speed Range) are reliably implemented up to SIL 3 or PL e. At only 12.5 mm, the device has an impressively compact design.

Main features

- Overall width of 12.5 mm
- Safe motion monitoring up to SIL 3/PL e
- Fast commissioning via USB connection
- Force-guided relay outputs

PSRmotion
Configuration Software

Sensor-free PSRmotion zero-speed safety relay

The highly compact PSR-MM25 safety relay module monitors the downtime of single and three-phase AC and DC motors without additional sensor technology. The residual voltage induced by the motor windings is analyzed in order to detect zero speed.

Main features

- Overall width of 12.5 mm
- Safe zero-speed monitoring through SIL 3/PL e
- Easy startup via configuration button
- Can be used for machines with or without frequency converters
- Force-guided relay outputs

Safe signal transmission and explosion protection

Our products for safe signal processing can isolate, convert, filter, and amplify your signals. The product portfolio features interference-free transmission, functional safety in accordance with IEC/EN 61508 and EN ISO 13849, and explosion protection for all zones and material groups. In addition to standard I/O devices for the DIN rail, you also have a flexible interface system with integrated marshalling for universal I/O controllers.

 Web code: #3204, #1137

Your advantages

- ✓ Functional safety in accordance with SIL and PL as well as international Ex approvals
- ✓ High signal quality with safe electrical isolation, and a long service life with low self-heating
- ✓ Particularly space-saving due to the very compact design
- ✓ Simple power bridging and group error indication with the DIN rail bus connector
- ✓ Flexible plug-and-play signal marshalling system for universal I/O controllers

Our products with functional safety and explosion protection

Signal marshalling for Universal I/O systems with VIP I/O marshalling

VIP I/O marshalling combines Universal I/O signal marshalling and processing as a uniquely compact modular system. With plug-in interface modules, you can configure your signal paths regardless of the type, without any wiring adjustments, and shorten your project runtime by up to 30%. Save space-consuming marshalling cabinets with complex cross-wiring. Benefit from a wide range of signals and functions.

Main features

- Wide signal spectrum, including SIL/Ex i, and surge protection
- Marshalling and interface level in a uniquely compact system
- Plan signal paths regardless of type, configure and test flexibly
- Plug-and-play configuration from various boards and plug-in modules
- Fast module replacement even with wiring in place

Highly compact MINI Analog Pro signal conditioners and measuring transducers

Simple as ever, slim and safe as never before: The highly compact MINI Analog Pro signal conditioners and measuring transducers combine intrinsically safe explosion protection and functional safety up to SIL 3 1oo1 in an overall width of just 6.2 mm. In your application, benefit from the particularly user-friendly design and operating concept, the wide range of configuration options, and end-to-end digitalization.

Main features

- International Ex approvals, including mining and marine approvals
- A safe solution up to SIL 3 1oo1 for every signal type and direction
- Plug-in connection terminal blocks with disconnect function
- User-friendly design and operating concept as well as versatile configuration options
- Pluggable communication gateways and other digital services and features

MACX Analog signal conditioners and measuring transducers

The MACX Analog signal conditioners and measuring transducers offer you a comprehensive range of solutions for safe and reliable signal conditioning. The products, developed consistently for IEC/EN 61508 and PL EN ISO 13849 safety applications, ensure the safety of people, the environment, and the system. In intrinsically safe circuits, the Ex i versions provide you with explosion protection in up to all zones and substance groups.

Main features

- International Ex approvals, including mining and marine approvals
- For all safety-related applications through SIL 2, SC 3, and SIL 3
- Versions with Performance Level certification in accordance with EN ISO 13849
- Overall width starting from 12.5 mm for single and two-channel products
- Flexible supply: modular 24 V power bridging with group error messaging or wide range input up to 230 V AC/DC

Safe motor and speed starters

The safe CONTACTRON hybrid motor starters combine up to four functions in one device: emergency stop, motor start, reversing function, and motor protection against overload. In addition to standard devices for parallel wiring, network-capable versions – which can be integrated into fieldbus environments – are also available. The CONTACTRON Speed Starter, with intuitive operation, is the new device class between motor starters and complex frequency converters. This compact solution provides functions for different speeds, soft start, and safe stopping with the Safe Torque Off (STO) function.

 Web code: #0568, #2820

Your advantages

- ✔ Less space required with the narrow design
- ✔ Cost-effective solution for different speeds and soft start
- ✔ Service life up to 10 times longer with CONTACTRON hybrid motor starter technology
- ✔ Adjustable motor protection with bimetal function
- ✔ Safe shutdown with the integrated safety function up to SIL 3 and PL e

Easy, safe, and efficient

Hybrid motor starters: Stand-alone

Hybrid motor starters – standard

Switch motors quickly and reliably with the compact hybrid motor starters. Use the devices wherever three-phase asynchronous motors from 50 W to 3 kW need to be reversed and protected. Our product range of hybrid motor starters consists of direct and reversing starters that are available with various functions such as emergency stop and motor protection.

Hybrid motor starters – modular

CONTACTRON pro is the new version from the CONTACTRON family, offering simple safety integration and modular extension options. Everything on the basis of hybrid technology – for an increased level of simplicity in functional safety, high system availability, and easy handling.

Hybrid motor starters: Network-capable

Integration into fieldbus systems is realized via the interface system connection. Corresponding gateways are available for all common fieldbus systems. Easily transfer your process data and quickly network your devices within the framework of digitalization and Industry 4.0, both with the interface system (IFS) and also the available IO-Link versions.

Main features

- Up to 32 devices per gateway possible
- The easy-to-install solution for networking, communication, data transmission, and 24 V power supply
- Transmission of status messages to the controller, e.g., overload, overload advance warning, underload, symmetry, etc.
- Safe shutdown possible via enable inputs
- PROFINET, PROFIBUS, PROFIsafe, EtherNet/IP, Modbus, CANopen, IO-Link

Speed starters

The CONTACTRON Speed Starters are available in a wide range of versions: performance classes between 0.25 and 1.5 kW, with and without EMC filter, and with 1- or 3-phase mains input. Select the appropriate product for your application.

Main features

- Variable speed
- Ramp function
- Analog input
- Safe Torque Off function
- Intuitive operating concept

Configurable safety systems

With configurable safety systems from Phoenix Contact, you can adapt your safety technology so it is tailored to your needs. Use our high-performance basic modules as a stand-alone solution. Extend the system flexibly with extension modules including motion and analog value data monitoring. Our configurable safety systems combine functionality and flexibility. At the same time, they close the gap between simple safety relays and programmable safety controllers.

 Web code: #1257

CANopen

EtherCAT

PROFINET

PROFIBUS

CC-Link

DeviceNet

Modbus

EtherNet/IP

Your advantages

- ✓ Cost-effective safety solution with a high level of adaptability to individual requirements
- ✓ Fast startup with easy hardware and software configuration
- ✓ Minimized machine downtimes with comprehensive, easy-to-understand diagnostics

Configurable safety system for your specific application

PSRmodular safety system

PSRmodular is a flexible safety solution for monitoring your machine or system. In addition to monitoring classic safety functions such as emergency stop signals, safety door interlocks, light grids, and safety mats, you can also realize safety functions such as speed, zero-speed, direction of rotation, and safe analog value monitoring.

Main features

- Modular extension possible up to 160 I/Os
- Applications up to PL e or SIL 3
- TÜV certified
- Overall width of 22.5 mm
- COMPLETE line standard
- A wide range of extension modules
- XC product versions for use under extreme conditions
- Push-in Technology
- TBUS DIN rail bus connectors

Comprehensive diagnostic functions that can be configured easily

PSRmodular provides you with comprehensive function and diagnostic options, and can easily be configured without prior programming knowledge. Use our configuration software comprised of preconfigured and TÜV-certified software blocks. Design your safety system easily with drag and drop. A detailed simulation and a reporting function are available for validation.

PSRmodular
Configuration Software

Safe I/Os

With our I/O systems, integrate functional safety easily and reliably into your favored network, whether in the control cabinet or in the field. Use our safe PROFI-safe I/O modules as normal in combination with your safety controller in a PROFINET or PROFIBUS environment. As an alternative, SafetyBridge Technology enables you to realize simple and network-independent decentral safety solutions, without the need for a safety controller.

 Web code: #1544

Safety over
EtherCAT

SafetyBridge Technology
Designed by Phoenix Contact

Your advantages

- ✓ Easy integration into all common networks via PROFI-safe or SafetyBridge communication
- ✓ Realize cost-effective safety solutions without additional safety controllers with SafetyBridge Technology
- ✓ Maximum system availability with real-time access to safety-relevant status and diagnostic information

Safe I/Os for the control cabinet and field installation

Safe I/Os for the control cabinet: Axioline

Axioline F

Axioline F is the I/O system with a block-based modular design. With its particularly short response times, Axioline F is ideal for fast and synchronous processes. The safe SafetyBridge I/O modules provide the ability to realize safe, decentral communications solutions without a safe PLC. In PROFIBUS and PROFINET networks, the PROFIsafe modules are used to acquire and output safety-related signals.

Axioline Smart Elements

Axioline Smart Elements are compact, plug-in, system-independent I/O elements. Combine safe input and output modules, plus non-safe Smart Elements on a single backplane to save a great deal of space. Comply with the highest safety requirements up to PL e and SIL 3 with our TÜV-certified and PROFIsafe-capable I/O modules.

Safe I/Os for the control cabinet: Inline

Inline offers not only a particularly large choice of function terminals, but it also allows you to use a tailor-made number of channels on modules and supports local bus extension to the field with the branch terminal. You can therefore create your own individual I/O solution.

Main features

- Maximum flexibility with a large selection of I/O terminals, function terminals, bus couplers, and controllers
- Narrow overall width and tailored number of terminal channels save space in the control cabinet
- Branch terminal enables local bus extension to the field without additional bus couplers

Safe I/Os for field installation

With Axioline E, you can process signals outside the control cabinet. The extension of the IO-Link technology enables consistent communication from the control level right through to the connection of safety-related sensors and actuators. With IO-Link Safety, you will benefit from the IO-Link advantages you have become accustomed too in the field of functional safety as well, including universal use, data accuracy, and data availability. This enables you to introduce new, manufacturer-independent machine and system concepts.

Main features

- IO-Link Safety master for PROFINET/PROFIsafe communication
- IO-Link Safety device for integrating safe sensors and actuators into IO-Link Safety systems
- Simple connection with the M12 connection technology
- Flexible use with multifunctional ports

Safe control technology

Realize your automation applications up to SIL 3 with our high-performance PROFIsafe controllers. Use our safe extension module for your standard PLCnext Control. Or select our high-performance controller for high demands on safety and availability.

 Web code: #1543

PLCnext Technology 
Designed by Phoenix Contact

Your advantages

- ✓ Integration of PLCnext Technology
- ✓ Standard and safety programming with PLCnext Engineer
- ✓ Realization of the highest safety requirements in accordance with SIL 3 or PL e
- ✓ Connection to Proficloud and use of apps from the PLCnext Store
- ✓ Integration into the modular Axioline system with the PLC extension module

Safe control technology for complex systems

Modular PROFIsafe extension

Take advantage of the individual extension option for the compatible, modular PLCnext Control. With its left-alignable functionality, the PLCnext Control can be extended with a safety-related SPLC for PROFIsafe networks. This transforms the PLC into a fully-fledged safety controller up to SIL 3/PL e that communicates as an F-host via PROFIsafe. At the same time, it can be operated under a superordinate PROFIsafe controller as an F-device.

Main features

- Support of PROFIsafe profile V2.6.1
- PLC extension module for AXC F 2152 and AXC F 3152
- Direct I/O communication
- Integrated PROFIsafe F-Device
- SPLC 1000 safety CPU:
1 x Arm® Cortex®-M4, 180 MHz, 1 x Arm® Cortex®-M4, 100 MHz, 32 F-Devices
- SPLC 3000 safety CPU:
1 x Arm® Cortex®-A9, 800 MHz,
1 x Arm® Cortex®-A8, 600 MHz,
300 F-Devices

Safe PLCnext Control

The first PLCnext Control that combines standard- and safety-relevant calculations in one device. As a part of the open PLCnext Technology ecosystem, parallel programming based on established software tools is possible. This enables you to combine, for example, functions in accordance with IEC 61131-3 with routines from C/C++, C#, and MATLAB® Simulink® in any way and to merge them into an overall system. You can connect to Proficloud directly and integrate individual cloud services.

Main features

- PROFINET controller and device
- Support of PROFIsafe profile V2.6.1
- Integrated PROFIsafe F-Device
- Safety CPU:
1 x Arm® Cortex®-A9, 800 MHz,
1 x Arm® Cortex®-A8, 600 MHz
- Standard CPU:
Intel® Core™ i5-6300U
(Dual Core, 2.4 GHz)
- M2M system networking with OPC UA

Safety programming

With PLCnext Engineer, both standard PLC functions and the full range of safety functions can be programmed in just one editor.

The PLC and safety programming are then installed on the PLCnext Control in one project. This automatically unpacks and automates the programs into two parts: the PLC code and the safety code.

Safe power supplies

The high-performance QUINT POWER power supplies ensure superior availability of your system with maximum functionality. QUINT POWER satisfies the requirements in accordance with functional safety (SIL) and ensures maximum operational safety. Whether in parallel operation or when connected to different phases, the load is reliably supplied even despite problems with the input voltage.

 **Web code:** #1513

Your advantages

- ✓ Superior system availability with SFB Technology and preventive function monitoring
- ✓ Secure power supply for your application with SIL certification in accordance with IEC 61508 and IEC 61511
- ✓ Fully functional monitoring with redundant system

Power supplies with maximum functionality

QUINT POWER for maximum operational safety

The QUINT POWER Plus version satisfies functional safety requirements (SIL 3, HFT = 1 in accordance with IEC 61508 and IEC 61511). It can therefore be used in safety-related applications.

The TÜV-certified double OVP (overvoltage protection) switches the output off in the event of an error in order to protect the load against overvoltage.

With an integrated decoupling MOSFET, this power supply is suitable for 1+1 and n+1 redundancy and increases system availability.

Safety: The new standard protective coating and ATEX, IECEx, and HazLoc approvals enable it to also be used within potentially explosive areas.

The solution is rounded out with an approved temperature range of -40°C to +75°C.

Main features

- Strongest output side with static boost, dynamic boost, and SFB Technology
- Exceptionally robust input side with integrated gas discharge tube
- Comprehensive signaling with analog, digital, and relay contact
- 1+1- and n+1 redundancy with integrated decoupling MOSFET
- Double OVP with SIL 3 certification in accordance with IEC 61508 and IEC 61511
- Protective coating and ATEX/IECEx approval
- UL ANSI/ISA-12.12.01 Class I, Division 2, Groups A, B, C, D (Hazardous Location)
- Wide temperature range of -40°C to +75°C

Redundant system for functional safety

Phoenix Contact gives you two options for designing a safe, redundant power supply system. In both cases, the functional safety requirements are satisfied with a safety integrity level of SIL 3. As such, it is suitable for safety-related applications.

Whether in parallel operation or when connected to different phases, the load is reliably supplied even despite problems with the input voltage. In order to detect errors at an early stage and thus increase system availability, both systems also feature complete, preventive function monitoring.

In addition to symmetrical load distribution, the 1+1 redundant power supply system comprising QUINT POWER 20 A and QUINT POWER Single ORING also provides separate cable routing right through to the consumer.

The QUINT POWER Plus version with integrated decoupling MOSFET for 1+1 and n+1 redundancy does not require an additional redundancy module, saving space and installation costs in the control cabinet.

Safe power supply system with QUINT POWER Single ORING

The Plus version is available in 10 A, 20 A, and 40 A versions.

Safe power supply with integrated decoupling MOSFET

Services and support

With our flexible range of services, we support you in all aspects of functional safety. Choose between industry-specific services for machine and system safety or services for safety in the process industry.

Our certified safety experts will be happy to advise you and support you during the necessary work steps and as you create the verification documentation.

Your advantages

- ✓ Expert contact persons with sound technological expertise
- ✓ Fast and ongoing support
- ✓ Selection of the ideal safety solution
- ✓ Wide range of seminars and workshops

Range of services for machine and system safety

Consultation

We provide advice on various subjects during the planning and implementation of your system:

- Design of the safety lifecycle: standards and their implementation
- Machinery Directive
- Retrofitting machines and systems
- Interlinking machinery

Engineering

To assess safety integrity, we determine the PL or SIL of the safety functions with the help of your technical documentation. This must be sufficiently robust to withstand random errors. In the case of Machinery Directive requirements, we implement the entire safety lifecycle process, from the risk assessment all the way through to the operating instructions.

Product support

We give you support if you have any questions on the safety hardware and software from Phoenix Contact. You can contact our support team about anything – from a preliminary clarification of the technical aspects through planning and implementation to operation.

Seminars

We provide instruction and practical training that is tailored to your individual requirements, such as:

Safety application software:

- Requirements on safety-related software
- Specification of safety requirements and software
- Implementation of safety functions
- Development of function blocks

Functional safety in the process industry in accordance with EN 61511:

- Risk analysis
- Safety lifecycle
- Creation of PCE safety functions

Safety requirements in the process industry

Design guidelines relating to functional safety are in place for the requirements on the safe operation of systems in the process industry. The international, harmonized procedure is described in IEC 61511.

A significant component of this is the safety lifecycle in conjunction with functional safety management.

Product overview

Safe motion monitoring											
PSR-M-B2-XC	Basic module (with large program memory)	8/4 ¹⁾	2 (pair) or 4 (single)	4	2	e	3	●	●	●	1337849
PSR-M-B3-XC	Basic module (B2) with integrated gateway function (PROFINET, EtherNet/IP™, Modbus/TCP, EtherCAT™)	8/4 ¹⁾	2 (pair) or 4 (single)	4	4 ¹⁾	e	3	●	●	–	1337855
PSR-M-EF1-XC	Failsafe extension module	8/4 ¹⁾	2 (pair) or 4 (single)	4	4 ¹⁾	e	3	●	●	–	1337850
PSR-M-EF7-XC	Failsafe extension module	4 analog	–	–	–	e	3	●	●	–	1337851
PSR-M-GW-CAN-XC	Gateway – CANopen	–	–	–	–	–	–	–	●	–	1337853

All XC modules have an extended temperature range and a coated printed circuit board.

¹⁾ Configurable

PSRmodular: Accessories		
Type	Description	Item number
PSR-M-MEMORY	Optional external memory	1105142
TBUS	DIN rail bus connector for basic module	1225375 (1 piece) 2200244 (50 pieces)
PSR-M-CABLE50	Cable for TBUS extension module	1104841
CABLE-25/8/250/ PSR-M/001	Cable adapter for PSRmodular (PSR-M-EM...)	1571214 or 1574602

PSRmodular: Configuration software		
Type	Applications	Item number
PSRmodular	Free configuration software for the configurable PSRmodular safety system. Download at phoenixcontact.com	–

FL PN/PN SDIO-2TX/2TX	Safe PROFINET gateway	–	PROFIsafe via PROFINET	4	e	3	3	2700651

¹⁾ Extension module for the modular AXC F 2152 and AXC F 3152 controllers from the PLCnext Control series

Software

Type	Applications	Item number
SAFECONF	Free configuration software for SafetyBridge modules. Download at phoenixcontact.com	–
PLCnext Engineer	Free engineering software platform for automation controllers from Phoenix Contact. Extension with add-ins at a charge, for example, safety programming in accordance with IEC 61508. Download at phoenixcontact.com	1046008
Motion monitoring library	Function block library for the safety-related monitoring of moving machines and machine parts with PLCnext Engineer. The library contains function blocks for the safe monitoring of speed, zero-speed, and holding position in accordance with standard EN 61800-5-2. Download at phoenixcontact.com	1812875

SD cards

Type	Applications	Item number
SD FLASH 2GB EASY SAFE BASIC	Programming and configuration memory, plug-in, 2 GB, with license key and user program for easy web-based configuration and commissioning of a SafetyBridge solution.	2403297
SD FLASH 2GB EASY SAFE PRO	As per SD FLASH 2GB EASY SAFE BASIC, including communication via Modbus/TCP, PROFINET, and email.	2403298

Product overview

¹⁾ In combination with QUINT4-PS/1AC/24DC/20 or QUINT4-PS/24DC/24DC/20/SC/+

Open communication with customers and partners worldwide

Phoenix Contact is a global market leader based in Germany. We are known for producing forward-thinking products and solutions for the comprehensive electrification, networking, and automation of all sectors of the economy and infrastructure. With a global network, we maintain close relationships with our customers, something we believe is essential for our common success.

You can find your local partner at
phoenixcontact.com
